VIVEK CHOPADE

Pune | +918010211426 | chopadevivek303@gmail.com | LinkedIn | GitHub |

Career Objective

Motivated and dedicated learner with good knowledge of AWS, cloud computing, and DevOps. Worked with AWS services like EC2, S3, RDS, VPC, IAM, and Lambda.
Familiar with Devops tools such as Git, GitHub, Jenkins, Terraform, Ansible,Docker and basic Linux and networking.Eager to learn, grow, and build a career in Cloud and DevOps technologies. Open to relocation.

Education

Bachelor of Computer Applications (BCA) - Savitribai Phule University, Pune | Aug 2022 – May 2025

Skills

- **Operating System**: Linux & Windows.
- **Databases**: MySQL and MongoDB.
- **AWS Platforms**: EC2, Lambda, S3, RDS, VPC, AMI, Auto Scaling, Load Balancers, SNS, SQS, CloudWatch.
- **DevOps**: Git, GitHub, GitLab, Bitbucket, Jenkins,Terraform,Ansible,Docker
- **Scripting & Networking:** Bash (basic), Networking fundamentals.

Projects

Serverless Weather Notification System(AWS):

- Built a serverless weather alert system using **AWS Lambda, SNS, and EventBridge**
- Scheduled automated daily executions with **EventBridge**
- Fetched real-time data via **OpenWeatherMap API**
- Processed weather details using **Lambda (Python)**
- Sent automated email notifications through **Amazon SNS**

AWS Task Manager – Flask + RDS:

- Developed a CRUD-based Task Manager web app using **Python Flask**
- Deployed the application on **AWS EC2** with public access
- Integrated **AWS RDS (MySQL)** for persistent database storage
- Implemented task add, update, and delete functionality
- Configured **AWS Security Groups** for secure EC2–RDS communication

Node.js Application Deployment using Jenkins CI/CD (AWS EC2):

- Implemented automated CI/CD pipeline using **Jenkins** for a Node.js application
- Integrated **GitHub Webhooks** to trigger builds on every code push
- Deployed application on **AWS EC2** with automated build and deployment stages
- Configured Jenkins pipeline to install dependencies, test, and deploy code
- Achieved faster, reliable, and zero-manual deployment using CI/CD automation

Terraform 3-Tier AWS Architecture (VPC + EC2 + S3 Backend):

- Provisioned a complete **3-Tier AWS architecture** using **Terraform (IaC)**
- Created custom **VPC, public & private subnets**, route tables, and security groups
- Deployed **EC2 instances** for frontend, backend, and database layers
- Configured **remote Terraform state backend using AWS S3**
- Improved infrastructure automation, consistency, and scalability using Terraform

Certifications

MCA – Master in Cloud Architecture (Fortune Cloud, Pune) – Pursuing
Practical experience with **AWS services** and **DevOps tools** to deploy scalable applications and automate CI/CD pipelines.
